Dampen down the surface of the paving slabs first

Apply our Patio Cleaner with a fine rose watering can or sprayer, to the surface area of the Paving Slabs

Leave 2 - 4 hours then jet wash clean the surface area of the Indian Limestone then leave to dry

When the Paving Slabs are completely dry and the conditions for the day are warm enough (10'c) and the forecast is clear for the day apply the Patio Sealer with our adapted sprayer evenly as a one coat only Roller and Brush can be used

Be aware that two coats can seal the surface and if moisture gets trapped or can rise from beneath the stone it cannot escape and will lead to Blooming.

Leave 4 hours to walk on and 24 hours to drive on.

This process will last 2.5 – 3 years and will then need resealing
